# Summer vacation begins!!

As July arrives, the number of hot days is gradually increasing. Starting this year, air conditioners have been installed in our school gymnasium. Six large units have been installed, and you can immediately feel the cool breeze. We plan to use the gym on very hot days when we absolutely have to use it.

Tomorrow is finally the start of the long-awaited summer vacation for children. When you think of it as a holiday, you tend to become lax with your daily life. Early bedtime, early rise, and breakfast are the same even during summer vacation. Please try to delay your regular lifestyle.

Summer  
Vacation  
goals

Live a safe and orderly life  
Let's go ahead and do things

During individual interviews, we distributed letters on "How to spend your summer vacation." They contain detailed information on how children should spend their summer vacation. Please read them carefully and ensure they have a fun summer vacation.

Health is the most important factor in having a fun vacation. Failure to follow rules is a major cause of water and traffic accidents. We want children to follow the instructions they received at school and have a fun summer vacation. We also often hear reports of suspicious people being seen in the city. If you encounter a suspicious person, please contact the police immediately.

月日	行事	月日	行事	月日	行事
9/2(月)	Second semester opening ceremony	17(火)	All grds leave school at 13:30	11(金)	Sports day preparation
	All grds leave school at 11:00	18(水)	All grds leave school at 13:30		1-4 grds leave school at 13:05
5(木)	3 grd Field trip	20(金)	4 grd Field trip		5-6 grds leave school at 14:10
	3 grd leave school at 15:50	10/1(火)	1-4 grds leave school at 14:40	12(土)	Sports day
9(月)	Collection date	4(金)	First semester closing ceremony	14(月)	National Holidays
13(金)	Futaba Asunaro Field trip	7(月)	Second semester opening ceremony	15(火)	Compensatory day off for sports day
	Futaba Asunaro leave school at 15:15		1-3 grds leave school at 14:15	24(木)	Marathon training begins
				30(水)	Music Recital (members only)

This will be the last paper version of "大榎". From the next issue onwards, only Machikomi mail will be delivered. Any number of family members can register for Machikomi mail delivery.

The garbage is carried

## 6月25日 (火) 4th grd field trip

We went on a school trip to Izumi Clean Center. There is an incinerator and a recycling center here. The incinerator is a state-of-the-art facility that melts waste instead of burning it. This will apparently reduce harmful smoke and embers. At the Recycle Plaza, the children learned about the importance of recycling, reducing, and reusing. We need to be careful in our everyday lives.

Garbage is separated by hand

## 1日 (月) なかよし交流会

Students from Toyama Elementary School and Sanrizuka Elementary School gathered in the gymnasium of Honjo Elementary School. The children enjoyed activities such as ball toss, king rock-paper-scissors, and colored baskets. It was very hot and humid, but the children seemed to enjoy themselves and were satisfied until the very end.

Ball Toss

## 2日 (火) 4th grd Rakugo class

This year, we had two Rakugo performers come and give a Rakugo class. They spoke in words the children could understand and the children were laughing out loud. The children were also taught a short Rakugo story and had the opportunity to perform it on stage. Although it was a short experience, it was a meaningful one for the children.

The children also performed Rakugo.

National Diet Building, Main Assembly Hall

Tokyo Tower Glass Floor

## 4日 (木) 6th grd field trip

We went on a field trip to Tokyo during a heatstroke alert. The number of visitors to the National Diet building on this day was apparently at its peak, so the children waited under the scorching sun until they could enter. The kids had planned to climb Tokyo Tower by the stairs, but it was too hot, so we changed our plans. Then the earthquake came and stopped our trip! It was a trip of ups and downs.

## Heatstroke Alert

It's just so hot! It's common for temperatures to exceed 30 degrees! On the 8th, the temperature reached 37.7°C in the morning. In addition, the heat stroke index exceeded 32°C for the first time. It is said that even if you are careful, you can still get heatstroke without realizing it. Fluids, salt, and air conditioning are essential.

WBGT exceeded 32°C!

The shade index for the same time is "alert"

Cardboard Frisbee

## 10日 (水) Summer Festival

The Futaba Asunaro Summer Festival is here again this year. The children have been working hard in preparation for this day, making prizes and practicing their shops. Children from Futaba and Asunaro will have fun on this day. The 11th is the day to invite friends from the exchange class and have fun. I hope you can play nice and have fun with everyone.
